RAM will be offering two type of Programs:

1. Company Program: This is for companies that are interested in a new or replacement program for as low as five (5) cell phones.

If you don't like your current plan and want to change to a RAM Company Program, we can help evaluate your current provider and restart with a new one.

2. Employee Value Ad Program: This is a wonderful program for the individual employee who wants to take advantage of a company discount.

As long as your company participates in the program, employees can benefit. To begin, it doesn't cost the company anything to join. If only 1 employee signs up or every employee signs up, all will realize the great benefits of this plan. There are no minimum cell phone orders for the program to exist.

Acronym Corner

JPEG

Joint Photographic Expert Group. JPEG is an industry standard for still image compression that has moved into full motion video. JPEG is a compression technique based upon intraframe encoding technology. It allows for the full restoration of symmetrically compressed images.

HMLP

High-speed multi-layer protocol. Standard for high-speed transmission. T.120 systems must use this for high-speed transfer. HMLP channels must be multiples of 64Kb/s.

Full-duplex audio

Two-way audio may be captured and reproduced simultaneously. With full-duplex audio, the microphone may capture local audio for transmission while the far end audio may be heard clearly. Interruptions and double-talk are possible.

IRS to Stop Collecting 3% Federal Excise Tax

Yes, you read that correctly. As of August 1, 2006 the Internal Revenue Service (IRS) announced that it will stop collecting the 3% Federal Excise Tax (FET) on long-distance telephone service.

A Little History

The FET was established in 1898 in order to fund the Spanish-American War. The IRS required phone companies to collect a 3% federal excise tax from their customers based on each customer's local, long distance and teletypewriter.

And Today

On May 25, 2006 the IRS announced they would stop collecting the FET on long distance only dated on and after August 1, 2006. However, you will still see the FET on the local part of your phone bill.

Businesses can collect their past phone bills since February 29, 2003 by tallying the federal excise tax and insert that amount on your 2006 tax form. Consult IRS Form 2006-50 and your tax accountant for the best way to claim your FET tax.

(cont'd from pg 1)

These Programs are a perfect offering with the kind of value needed by most companies. It offers:

- A value ad service to all your employees. If you currently have a cell phone service that only includes management and sales for instance, keep the program and offer the value ad service to everyone else in the company!
- No minimum amount of cell phones. If only one person in a small or large firm joins and uses the program...that's fine!
- Get a 5-8% discount over what you would get at a cell phone retail store.
- Family members of employee can join as well and realize the same great advantages!
- Your cell phone will be shipped directly to you within 2 days!

Auditing of Your Cell Phone Bill

Many companies centralize the cell phone management in order to keep costs in alignment. However, monthly reconciliation of the bill can be quite daunting. As a result, the task gets pushed out and many charges are paid that could be saved.

Let RAM assist with this task and audit your cell phone bill through our partnership with BBR. You will enjoy the findings as BBR has assisted many companies in saving time, money and resources.

Ask today about the service offerings.
